Long Range Facilities Plan Public Engagement

In support of its strategic plan, and its core mandate of supporting programs and services for all students, the Board of Education of School District No. 67 is engaging in a Long-Range Facilities Planning process. The Board has received recommendations from staff and will be considering school closures and consolidation as part of this process. The Board has initiated a public engagement process to receive feedback and questions from community.

Three engagement sessions will be held in February and will be focused on sharing more detailed information with the public and school communities within each family of schools. While the focus of each session will be on a particular family of schools, community members are welcome to attend any of the engagement sessions.

The February engagement sessions will include:

- An opportunity for a “gallery walk” to see visuals of various components of the proposed plan.
- Focused “table talks” to receive community input on considerations of the proposed plan.

Feedback and questions will be collected throughout the evening and will be shared on the “LetsConnect” website following the sessions.

The sessions will be facilitated by school administrators and district staff. Trustees will be present to listen to discussions and receive questions and feedback.

The Board will be reviewing and considering all feedback received throughout the public engagement process as they consider the recommended plan.

Additional community engagement sessions will take place in March.

Investing in our Future Long Range Facilities Plan - Engagement Timeline
